

## Directions for Microsoft Authenticator and the Canvas App

---

To connect the Microsoft Authenticator. You'll want your phone and a computer or tablet.

1. On your phone, download the Microsoft Authenticator app. Be sure you get the right one. The icon looks like this: 
2. Once you open the app, you'll see an option for scanning a QR code, stop there.
3. On your computer or tablet go to [alabama.instructure.com](http://alabama.instructure.com). (That's the URL of our new Canvas instance. Instructure is the company that owns Canvas.)
4. Login with your A# credentials (A#@alabama.edu and the 12-character password you set up).
5. Click "Next" until you see a QR code (2 or 3 times).
6. On your phone, use the scan QR code option to scan the QR code displayed on your computer or tablet.
7. On your computer or tablet you'll be presented with a number (all of the ones I've seen are 2-digits), type that number into the text box provided on your phone.
8. On your computer or tablet, you'll click "Next" until you're logged into Canvas.
9. You'll use this Canvas instance from now on.

To use the Canvas Student app:

1. Download the Canvas Student app. If you already have it, you'll need to log out of the current account. 
2. When you search for a school, use ACCS (Alabama Community College System)
3. Login with your new credentials this first time. I don't think you'll have to log in again.
