

**Southern Union State Community College
Manufacturing Production Technician Program**

The Manufacturing Production Technician Program is a non-credit 180-hour program for the College. Individuals may enter the program without a high school diploma or GED; however, Southern Union as well as the credentialing agency strongly recommends that individuals enrolling in this program perform at a 9th-grade math and 10th-grade reading level as well as possess basic computer skills before enrolling in the Manufacturing Production Technician training program.

The Manufacturing Production Technician Program consists of four sessions: Safety, Quality Practices & Measurement, Manufacturing Processes & Production, and Maintenance Awareness. Candidates must pass all four sessions to receive the Manufacturing Skill Standards Council (MSSC), Certified Production Technician (CPT) Certification.

Manufacturing Production Technician Program three delivery options and the upcoming sessions are:
